

# 5. Closing stock

The container coordinator is also responsible for closing the container's stock. To do so select 'Close Stock' in the stock tab.

To select the available products, you will have access to a product catalog and choose the amount for each one of them. All inputs should be filled even if the amount is 0.

CONFIRM

The 'confirm' button will remain greyed out until all the quantities for each state/product (full, empty, accessories, suspected defective and defective) are inputted.

Once confirmed, the remaining actions (report defective and filling orders) will be greyed out. The only available action would be to open the stock.
