

1. How to Log in/Clock in

Log in

In order to use the app, you need to log in using a **valid phone number**. After that, you will receive a confirmation code and the application will ask you to introduce that code to guarantee a secure authentication.

A screenshot of a mobile application interface for "PRO DELIVERY". The app title is displayed in large, bold, red letters "PRO" above the word "DELIVERY" in smaller, dark blue, spaced-out letters. Below the title is a white input field for a phone number. To the left of the input field is a small icon of the Kenyan flag. To the right of the input field is a small blue telephone handset icon. The text "Phone number" is written above the input field, and the placeholder text "+254 701 xxxxxx" is visible inside the field. Below the input field is a dark blue rectangular button with the text "LOG IN" in white, uppercase letters. The entire interface is set against a light gray background.

Confirm the code and you're ready to use the app. In case something goes wrong, you can always ask for another code by clicking on the **Resend Code** button.

Clock in

To perform any action in the app, besides the **Login/Log Out**, you need to **Clock In** to start your shift. You can simply do that by clicking on the **Clock In** button. Once you're clocked in, you can view your assignments (trips and vehicles) and start your working shift.

Clock out & Log out

Similar to **Clock in**, after finishing your shift, you should click on the **Clock Out** button and Log out. If you Log out without clocking out, it will automatically register your shift as finished.
