# 3. How to Start Trips

Start a trip

Every driver can perform one trip at a time. To see your scheduled trips, access the **Trips** tab and check the **Upcoming** trips.
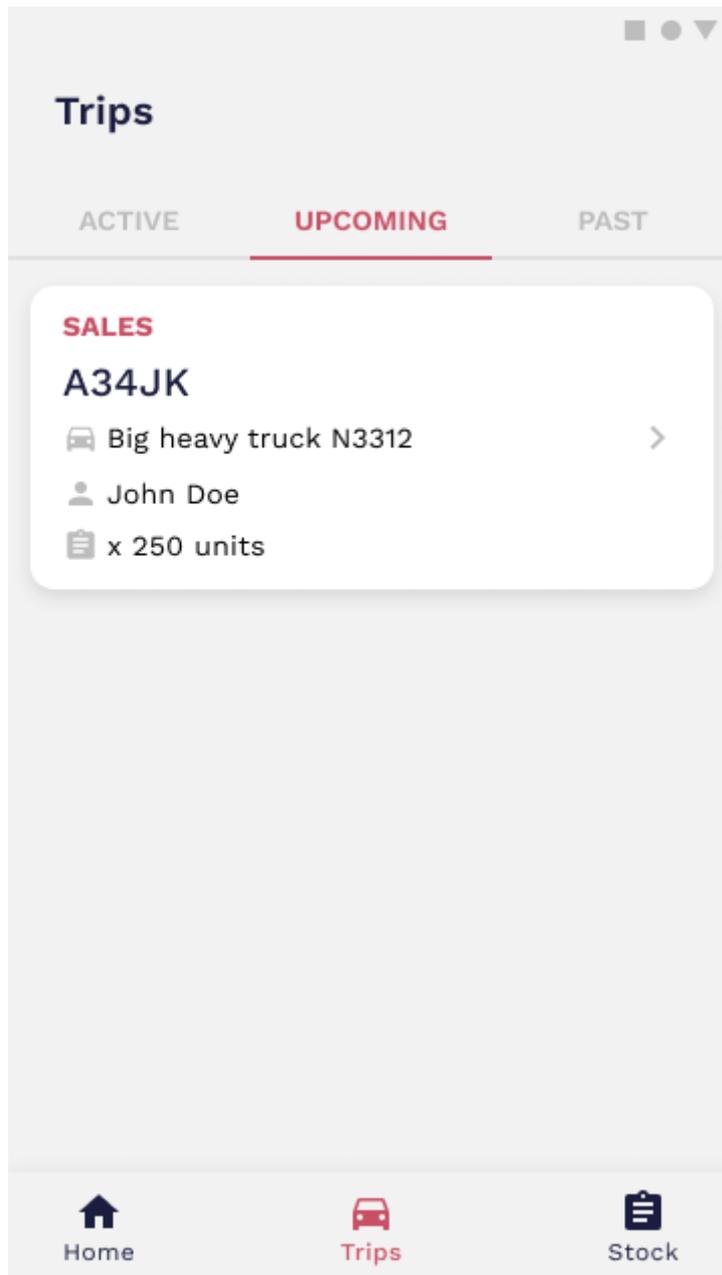

To start a trip all you need to do is select a trip card. It will show you the details page where you can load the products. Each card displays the trip type, ID, vehicle, your name, and the product quantity or warehouses.

SALES

OFFLOAD

Selling history   ›
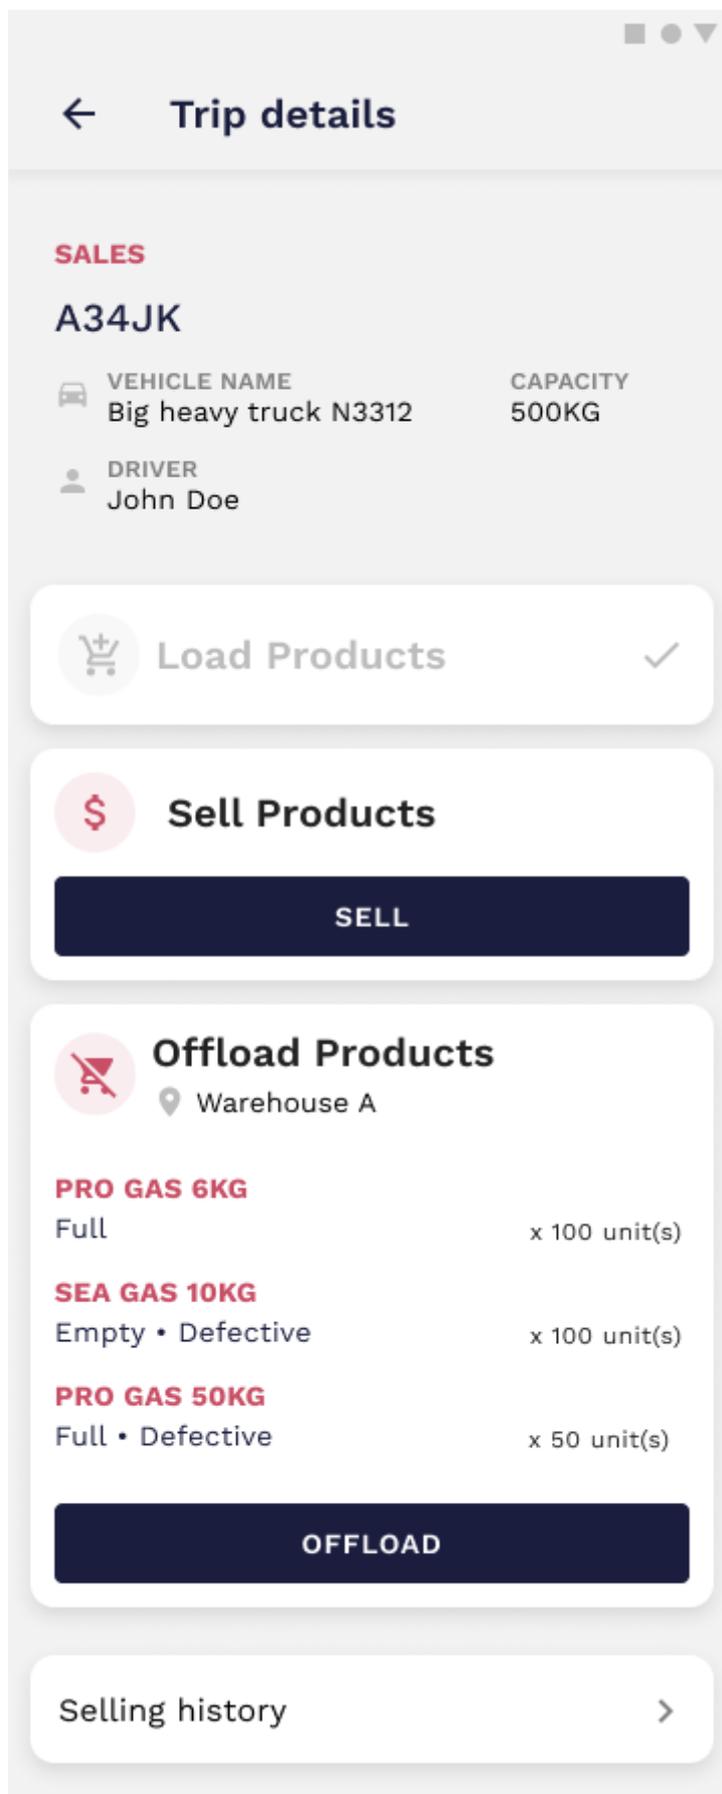

Click on **Start Trip** to initiate the trip and start to sell the products. The offload option is always available because it is not mandatory to sell every product from the stock in order to offload.
