- Start a trip
- Finish a trip

Start a trip

Every driver can perform one trip at a time. To see your scheduled trips, access the **Trips** tab and check the **Upcoming** trips.

To start a trip all you need to do is select a trip card. It will show you the details page where you can load the products. Each card displays the trip type, ID, vehicle, your name, and the product quantity or warehouses.

Image not found or type unknown

The **Load** state changes to **Pending** and the action is completed when both driver and container manager sign the action. You are able to start your trip when a pop-up notification shows up.

Click on **Start Trip** to initiate the trip and start to sell the products. The offload option is always available because it is not mandatory to sell every product from the stock in order to offload.

Finish a trip

Once your shift is finished, you have to finish the current trip. You don't have to sell all of the loaded products to finish a trip but you will need to **Offload** them first.

All you need to do is go to the final location and offload your products. The process is the same as for the loading. Both driver and container manager have to confirm the quantity and sign the action.

After that, a pop-up will be displayed and you can finish the trip.
